Etendo tailored to your needs

We are **LEGO** for business software.

Etendo

At Etendo, we work so that you and **your company can innovate without limits.**

Our software is flexible, extensible and scalable. Like LEGO pieces: **you build what you need in a simple and customizable way,** so you can innovate in your company.

Etendo is more than an ERP

It offers you compatibility with any process and adapts to your industry and any business model. Etendo is the operating system used by companies that need to take a step forward in innovation and quality.

At Etendo, we have a network of partners and strategic allies around the world

Who can help you implement the software. We strive for simplicity in everything we develop to help Etendo partners, developers and end users achieve their goals.
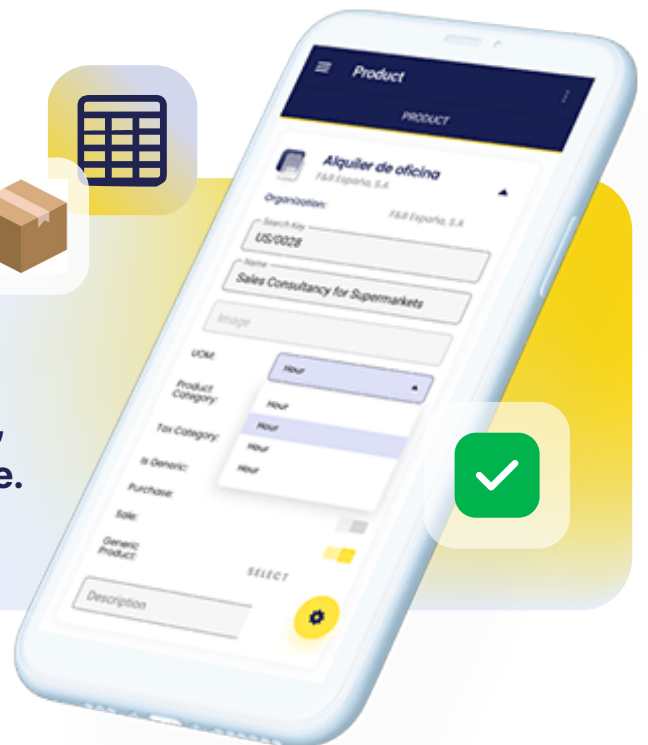

In addition, Etendo has artificial intelligence

To support your team at anytime. With our technology, you will be able to make better decisions and optimize your processes.

Etendo

Is **extensible, customizable, simple, flexible and scalable.**

Choose Etendo

Take your business to the next level

Our platform is **secure**, **stable** and with the necessary **flexibility** to adapt and integrate with e-commerce systems, data analysis, human resources management and much more.
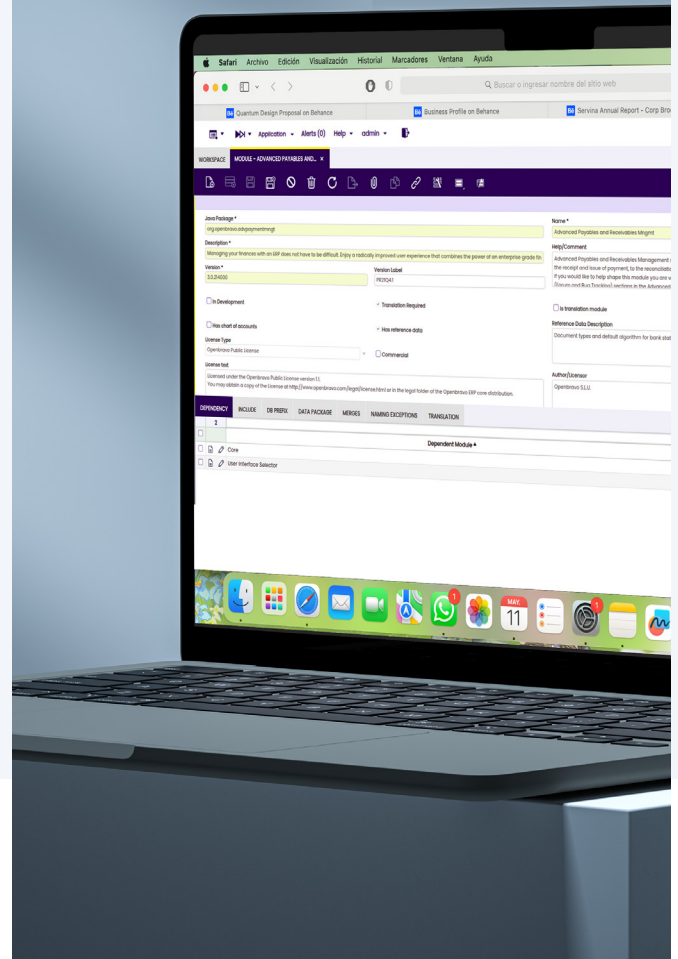

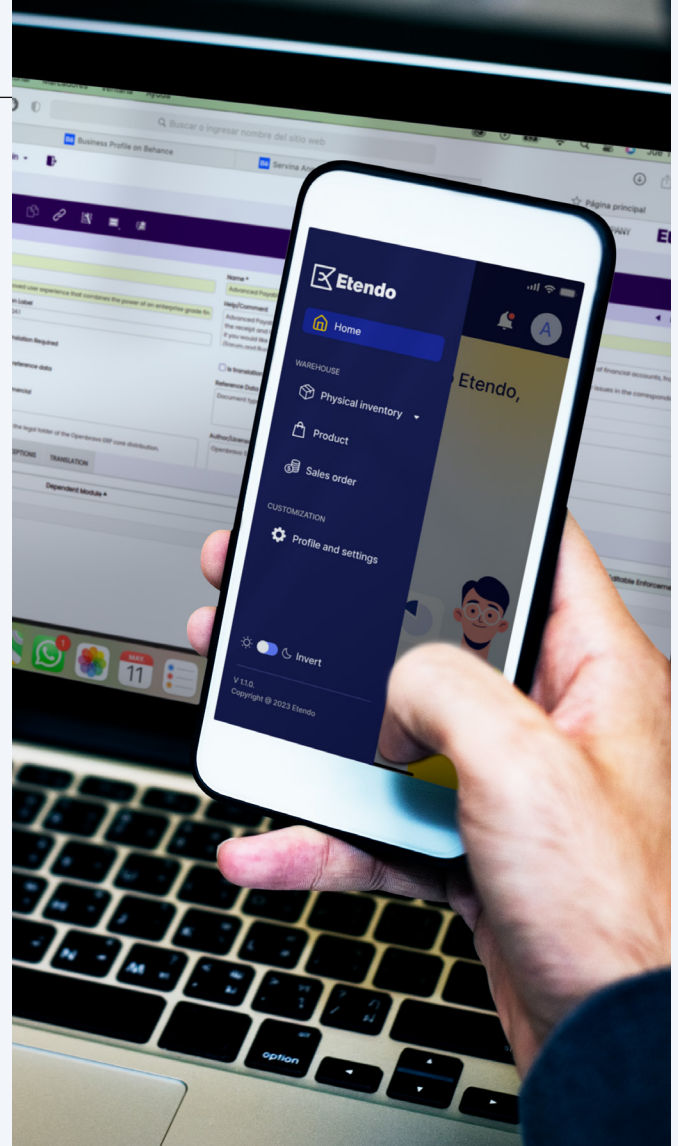

Be global

Work from anywhere and access the platform from a **desktop** browser or our **mobile app.** Configure your Etendo environment according to your needs, our software is **multilingual** and **multicurrency,** and is able to adapt to your country's accounting system easily.

The solution and the support you need

We build **customized modules** to offer you a personalized platform **adapted to your needs.** Our partners work alongside you to provide support at every stage of the development process and **are there for you whenever you need them.**
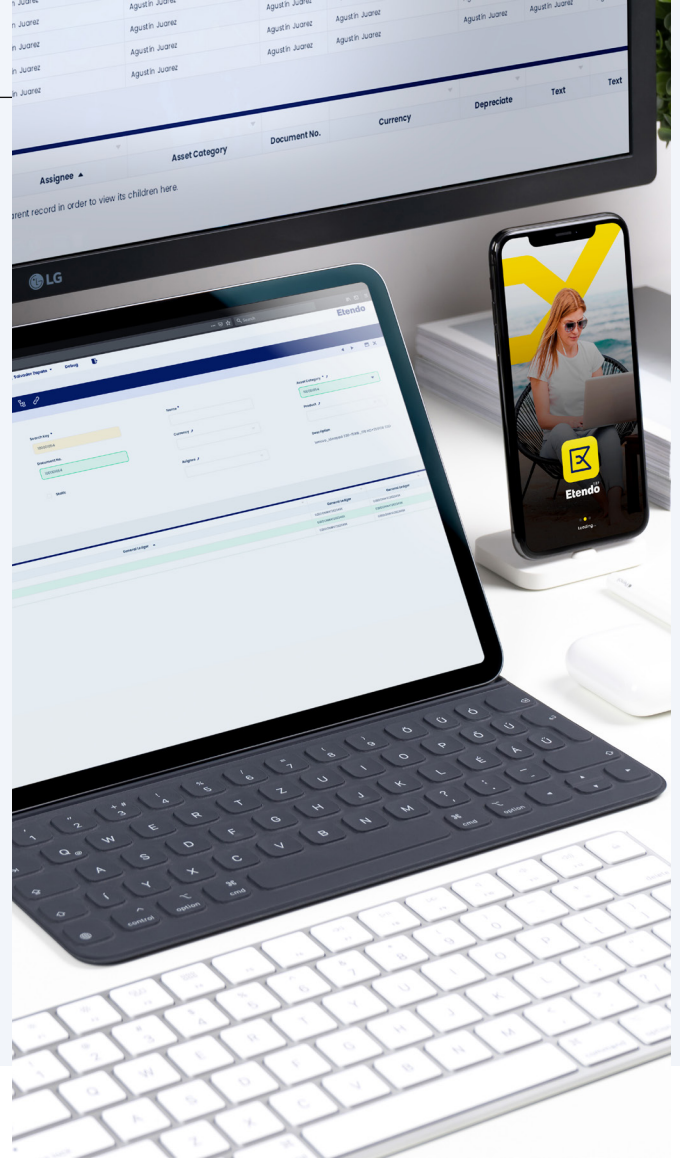

In addition, you can count on Bastian, the **Etendo GPT chatbot** that supports you in your learning process and allows you to solve all your doubts about the platform so that you can take full advantage of its full potential.
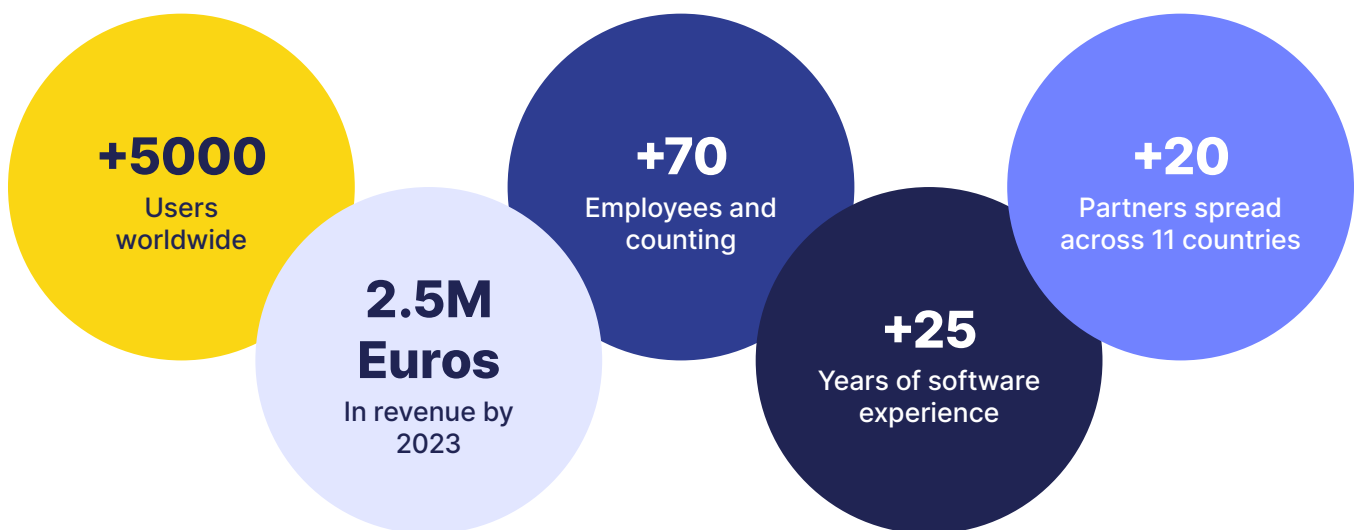

A flexible platform

Etendo is able to **adapt** to your type of industry and the size of your business. The platform offers the possibility to add the modules you need, such as purchasing, production, warehouse, sales, finance, accounting, project management, human resources and more.

Currently, customers in agribusiness, production, distribution and product logistics have already adopted Etendo. Sales teams, accounting firms and specialized industries have also adopted **Etendo as the essential platform to develop their business and maximize their potential.**

Etendo is the operating system designed to drive **innovation and quality in companies.**

Etendo is:

Flexible

Easily integrates with other software and applications ensuring compatibility at all times.

Scalable

Uses open source code to easily scale and ensure the quality and performance your business needs as it grows.

Customizable

You can customize the software according to the specific needs of each company and easily connect new modules.

Dynamic

It is constantly updated with new versions to keep it secure and error-free.

Innovative

Tools based on artificial intelligence are added to offer immediate and revolutionary solutions to the platform.

Extensible

It can be extended and modified to add new functionalities according to the size and type of industry.

Bastian is a **chat based on Artificial Intelligence.** It was designed to help you every time you interact with our platform.

Bastian knows all the functionalities and everyone in your company will be able to access it as a source of consultation.

Learn more about us

We are a company formed by a young team, **energetic and experienced** in cutting-edge technologies.

We are betting on the future.

We work with a curious and innovative team that has embarked on an exciting journey into the world of Artificial Intelligence to improve our ERP development process, to streamline processes, improve efficiency and deliver better solutions to our customers.

We have developed several voice-based AI tools, leveraging chatbots powered by LLM models such as GPT for QA review, and using AI to assist with documentation creation and generation through tools such as Synthesia.io.

Your company, our software.

Your ideas, our software.

Your creativity, our software.
